

JOB DESCRIPTION

May 2025

Title of Post	Clinic Supervisor
Accountability	Senior Management Team
Reporting to	Clinic Manager
Staff managed	Designated Junior Clinic Supervisors
Overall responsibilities	The post holder will be responsible for the operational and professional effectiveness of the LSO clinic as a learning environment for student practitioners and for the management and care of patients.
Key tasks	To assist students to acquire, consolidate and develop the practice capabilities in accordance with the validated pathway, and the practice standards set out by the statutory body (GOsC). To accept responsibility for the interventions with patients, whether made by themselves or made by designated students. To deliver and contribute to regular clinic-based tutorials, critical appraisal and other teaching activities, promoting an active and supportive learning culture. To supervise and undertake student assessment activities in compliance with course and college regulations including the provision of appropriate feedback. To communicate effectively through oral, electronic and written media with staff, students and patients. This includes receiving and responding to communication in a timely manner, ensuring that information is passed to relevant parties, and generating effective records. To continue to develop, both as an osteopath and as a clinical educator, and respond to challenges and changes in professional practice, and to participate in structured staff appraisal and staff development activities. To contribute to team working and step into the role of team leader as required. To act as an exemplar of professionalism and inclusive ethical behaviour, including maintaining boundaries and acting with candour when appropriate. To attend and participate in meetings as necessary. To undertake other tasks as required from time to time.

Essential attributes	Degree or diploma qualification in osteopathy Full registration with the GOSC and compliance with OPS. Minimum of 3 years in practice as an osteopathic practitioner. Teaching qualification or working towards membership of the HEA.
Desirable attributes	Teaching experience Teaching qualification Experience as an external examiner in osteopathy Post qualification professional development activities
